DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-21 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1, 11 and 12, the words "deflected" or "deflectable" are misleading and change the scope of the claims, with no support in the specification. A proper word such as displaced or displaceable respectively should be used to convey the related meaning.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2855

4. Claims 1-2, 11-13 rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 or 4 of U.S. Patent No. 6,508,138.

Although the conflicting claims are not identical, they are not patentably distinct from each other because they are both directed to a system of checking a cigarette with at least one push rod which is mounted in an axially displaceable manner in a moveable testing element in the direction of the cigarette and the push rod being displaced as it strikes against the cigarette and an electrically signal is generated as a result, wherein the position of the testing element is determined. In the case of a plurality of push rods, the respective position of the testing element then is determined. Although "138" discloses the detail of the specific sensing devices in terms of generation of electric, magnetic or electromagnetic, it would have been obvious for a skilled artisan at the time of the invention to use any kind of suitable sensor for the detection of the position of push rod for convenience.

Response to Amendment

5. Applicant's argument filed on 3/15/05 has been fully considered but is not persuasive. However, the rejection ground has been changed to 112 second paragraph to be more properly address the problem. The term "deflect" generally conveys a bending, flexing or folding, and by no means indicates a liner motion, translation or displacement. From examination view point, such miss-representation can account for a drastic change in the scope of a claim. The confusion apparently, as mentioned by applicant, is due to poor translation of original document. In any rate, the disclosure and the claims are to be accordingly corrected to clearly change "deflect" to "displace" (or similar terms).

Art Unit: 2855

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
